

ASHMIT GUPTA

Software Engineer | Mobile, AI & Cloud

Haryana, India | ashmit.ann05@gmail.com | +91 95186 52242 | [GitHub](#) | [LinkedIn](#)

SUMMARY

Software Engineer with **1.5+ years** building and shipping production **mobile, AI, and cloud** systems. Delivered an industrial IoT platform serving **3,500+ users and 250+ machines** and an on-device ML pipeline with **3× faster inference**. Strong in cross-platform engineering, applied AI/ML, and AWS-based DevOps.

EXPERIENCE

IEnergy Digital — Software Engineer

July 2025 – Present

- Built **Aurora**, a cross-platform (Android/iOS) IoT platform integrating **GPS, BLE sensors, and solar telemetry** with **Flutter**, serving **3,500+ users** and **250+ machines** with live safety alerts.
- Built an on-device **face liveness & anti-spoofing pipeline** with **Google ML Kit, ONNX Runtime, TensorFlow**, cutting capture latency **6s to 2s** and invalid captures by **90%**.
- Improved app performance (**34 to 52 FPS**) via **Flutter** rendering profiling and isolate offloading, optimizing Aurora's live map with **tile caching and viewport-based loading** for smooth performance with hundreds of live markers.
- Automated **CI/CD (GitHub Actions, Docker, Fastlane, AWS IAM/OIDC/S3)**, cutting release time **50 to 12 min (76%)**, adding **Shorebird OTA** and **Firebase App Distribution** for rapid patch and QA delivery.
- Led root-cause investigation for **multiple production incidents**, including a **server-side TLS cert chain failure** and false offline-detection fixed via a **custom native connectivity channel**, eliminating recurrence.

WhatBytes — Software Engineer

Feb 2025 – July 2025

- Refactored a monolithic **Flutter** codebase into **Clean Architecture** with dependency injection, raising frame rate from **40 to 54 FPS (35%)**, and published **3+ Flutter applications** to production across IoT/solar, healthcare, and gig-economy domains.

ADM Education and Welfare Society — Software Engineer

Oct 2024 – Feb 2025

- Built **2 native Android apps** for an NGO ambulance-dispatch platform, integrating **live tracking via SSE, OpenStreetMap, and Firebase Auth** on a modular architecture.

PROJECTS

Groundline

Personal Project | Python, FastAPI, React, Ollama, Qdrant, AWS EKS, Terraform, Argo CD, PostgreSQL

- Built **Groundline**, a full-stack **RAG platform** (React frontend, **FastAPI** backend/AI-server) with dual retrieval pipelines (vector + BM25) on the same **Ollama-served LLM**.
- Provisioned a custom **AWS EKS** cluster (**39+ resources**, 3 node groups) via **Terraform** with IRSA-scoped least privilege, isolating the AI plane behind **JWT** auth and **ClusterIP**-only services.
- Automated **GitOps** deployment (**GitHub Actions, ECR, Argo CD**) with **Trivy** vulnerability gating and **Grafana**-based observability.

Xsplito | Play Store

Personal Project | Flutter, Riverpod, Dio, Firebase

- Built **Xsplito**, a cross-platform **Flutter** expense-splitting app with **Clean Architecture** and **Riverpod**, shipped to the **Play Store** with **Firebase** auth and push notifications.

TECHNICAL SKILLS

Languages: Dart, Kotlin, Swift, TypeScript, Python, SQL, Bash

Mobile & Frontend: Flutter, React, Riverpod, Clean Architecture, MVVM, GoRouter

AI/ML: FastAPI, Ollama, Google ML Kit, ONNX Runtime, TensorFlow, RAG, Vector Search (Qdrant), BM25, Embeddings

Cloud & DevOps: AWS (EKS, IAM/OIDC, S3), Terraform, Kubernetes, Docker, GitHub Actions, Fastlane, Argo CD, Prometheus, Grafana, Cloudflare

Backend, Storage & Security: Node.js, REST APIs, SSE, Firebase, PostgreSQL, Hive, Redis, JWT, TLS, Secrets Manager, Trivy

EDUCATION

Maharaja Surajmal Institute

New Delhi, India

Bachelor of Computer Applications (BCA) — CGPA: 9.4 / 10

2022 – 2025

- Ranked in top 10 of graduating class
