

Ashmit Gupta

Cloud & DevOps Engineer

ashmit.ann05@gmail.com | +91 95186 52242 | GitHub | LinkedIn | Portfolio

SUMMARY

Software Engineer with **1.5+ years** automating and securing cloud infrastructure on **AWS, Terraform, and Kubernetes**. Built a **DevSecOps platform** (Trivy, SonarQube, **85% faster deployments**) and shipped two Kubernetes projects, including an **EKS platform** secured with **IRSA** and **OIDC**-based **GitOps**.

EXPERIENCE

IEnergy Digital — *Software Engineer*

Jul 2025 – Present

- Architected an AWS **DevSecOps** platform with **Terraform** (7 modules, **30+** resources), **Ansible**, and a kubeadm-based **Kubernetes** cluster, hosting **8+** services.
- Built **Jenkins** DevSecOps pipelines with hardened Docker images, gated by **SonarQube** pre-build and **Trivy** pre-deploy, cutting deployment time from ~40 to ~6 minutes (**85%**).
- Administered **EC2** instances in private subnets through **AWS Systems Manager (SSM)**, eliminating public IPs and direct SSH access to reduce the infrastructure attack surface.
- Automated Flutter Android/iOS release pipelines with **GitHub Actions**, **Docker**, and **Fastlane**, cutting build-and-release time from 50 to 12 minutes (a **76%** reduction).
- Built and deployed a **face liveness & anti-spoofing pipeline** and its backend service on **AWS**, using **Google ML Kit**, **ONNX Runtime**, and **TensorFlow**, cutting capture latency from 6s to 2s and invalid captures by **90%**.

WhatBytes — *Software Engineer*

Feb 2025 – June 2025

- Optimized **Flutter** rendering and refactored a monolithic codebase into **Clean Architecture**, raising frame rate from **40 to 54 FPS** (**35%** improvement).

ADM Education and Welfare Society — *Software Engineer*

Sep 2024 – Feb 2025

- Developed **2** native Android apps on a **modular architecture** for an NGO ambulance-dispatch platform, integrating live tracking via **SSE**, **OpenStreetMap**, and **Firebase Auth**.

PROJECTS

Groundline — **AI RAG Platform** | [Github](#)

Personal Project | Python, FastAPI, React, RAG, Qdrant, Ollama, AWS EKS, Terraform, OIDC, Argo CD, Trivy

- Built a dual-pipeline **RAG** platform (Chat + Compare): **Vector RAG** (chunk → embeddings → **Qdrant**) vs **OKF/BM25**, same **Ollama**-served LLM (11ama3.2:1b), streaming answers via **SSE**.
- Provisioned **AWS EKS** via **Terraform** with **IRSA** least-privilege access; isolated the AI plane on **ClusterIP** behind **Cloudflare** → ALB, secured by **JWT** and an internal service token.
- Automated **GitOps** (**GitHub Actions** **OIDC** → **ECR**, **Trivy** pre-push scanning, **Argo CD** sync, scale-to-zero node groups) with **Prometheus/Grafana** observability and **Secrets Manager**-backed secrets.

Scopify | [Github](#)

Startup Project | NestJS, PostgreSQL, Redis, BullMQ, Terraform, Ansible, Kubernetes (kubeadm), Argo CD, Jenkins, Trivy

- Built a **NestJS** + **Prisma** + **PostgreSQL** API with **JWT/Passport** auth, project invitations, and async email via **BullMQ/Redis**.
- Provisioned AWS infrastructure with **Terraform** (custom VPC, NAT, SSM, VPC endpoints) and bootstrapped a self-managed **kubeadm** Kubernetes cluster (Calico, Ingress-Nginx, EBS CSI) with **Ansible**.
- Automated CI/CD with **Jenkins** (multi-stage Docker builds, **Trivy** scans, GHCR pushes) and **Argo CD** GitOps for dev/prod deployments via Kustomize.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (VPC, EC2, EKS, IAM/IRSA/OIDC, NAT Gateway, S3, SSM, VPC Endpoints), Terraform, Ansible, Helm, Docker, Kubernetes (kubeadm, EKS, Deployments, StatefulSets, Ingress), Calico, Linux.

CI/CD & DevSecOps: Jenkins, GitHub Actions, Argo CD, GHCR, ECR, SonarQube, Trivy, Git.

Data, Networking & Observability: PostgreSQL, Prisma, Redis, BullMQ, NGINX, Cloudflare, Prometheus, Grafana, Secrets Manager.

Languages & Frameworks: Bash, Python, TypeScript, NestJS, SQL, YAML, HCL.

EDUCATION

Maharaja Surajmal Institute

2022 – 2025

Bachelor of Computer Applications (BCA) — CGPA: 9.4/10

Top 10 of graduating class.
